Ú

MAHARASHTRA STATE BOARD OF TECHNICAL EDUCATION, MUMBAI

TEACHING AND EXAMINATION SCHEME FOR POST S.S.C. DIPLOMA COURSES

COURSE NAME: DIPLOMA IN COMPUTER SCIENCE AND ENGINEERING

COURSE CODE: CW

DURATION OF COURSE: 6 SEMESTERS WITH EFFECT FROM 2012-13

SEMESTER: FIFTH DURATION: 16 WEEKS

PATTERN: FULL TIME - SEMESTER SCHEME: G

THEORY AND PRACTICAL PERIODS OF 60 MINUTES EACH.

Total Marks: 750

@- Internal Assessment, # - External Assessment, Wo Theory Examination, \$ - Common to all branches, #* Online Examination,

β - Common to CO/CM/IF/CD

Abbreviations: TH-Theory, TU-Tutorial, PR-Practical, OR-Oral, TW-Term Work, SW-Sessional Work.

- > Conduct two class tests each of 25 marks for each theory subject. Sum of the total test marks of all subjects is to be converted out of 50 marks as sessional work (SW).
- Progressive evaluation is to be done by subject teacher as per the prevailing curriculum implementation and assessment norms.
- > Code number for TH, PR, OR and TW are to be given as suffix 1, 4, 8, 9 respectively to the subject code.

Course Name : Computer Engineering Group

Course Code : CO/CD/CM/CW/IF

Semester : Fifth for CO/CM/CW/IF and Sixth for CD

Subject Title : Operating System

Subject Code : 17512

Teaching and Examination Scheme:

Teaching Scheme					Examinati	on Scheme		
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03		02	03	100			25@	125

NOTE:

- > Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- > Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Operating system is the software that makes a computers system operational. It is an interface between the human and machine. It drives all the hardware parts of the computer and is the first piece of software to run on the machine when the system boots.

OS is a core technology subject, the knowledge of which is mandatory for every user. If familiarizes a learner with the OS concepts, structure internal functionality and services and resource sharing. It will help a learner with OS design concepts. This subject will give a learner an overview of UNIX / LINUX OS.

General Objectives:

To develop following skills:

Intellectual Skills:

- 1. Learn the various milestones in the history of Operating Systems and various Generations of computers as well as the modern trends in Operating Systems.
- 2. Understand the kernel architectures, the functions of operating systems and the use of system calls.
- 3. Understand the concept of processes, multiprogramming, Process Control Blocks, context switching.
- 4. Learn about the scheduler and implement various scheduling algorithms.
- 5. Understand about Deadlocks, Inter-process communications.
- 6. Learn about Memory Management and File Management techniques of the OS.
- 7. Understand the structure and file system structure of Unix OS.
- 8. Use UNIX commands, vi editor and file utilities and write shell scripts.

Theory:

Topic No.	Contents	Hours	Marks
01	 Introduction: Objectives: ➤ Distinguish between various generation of computer. ➤ Classify different types of operating system. 1.1 Operating System - Evaluation, Generations 1st, 2nd, 3rd 1.2 Different Types of Operating systems- Batch operating system, Multi Programmed, Multitasking, Time Shared OS. Multiprocessor Systems, Distributed Systems, Cluster Systems, Real time systems. 	04	12
02	Operating System Structures: Objectives: ➤ State services & functions of Operating Systems. ➤ Use system calls ➤ Distinguish between different kernel architecture. 2.1 Different Services of Operating System. 2.2 System Calls- Concept, Types and Uses 2.3 Simple Structure, Layered, Monolithic, Microkernel. 2.4 Components activities- Process Management, Main Memory Management, File Management, I/O System management, Secondary storage management.	08	18
03	 Process Management: Objectives: Describe Process, process scheduling, schedulers. Describe inter-process communication & synchronization. Describe critical section problem & solution to ensure the consistency of shared data Describe multithreading models. 3.1 Process-Concept, process states, Process Control Block. 3.2 Process Scheduling- Scheduling Queues, Schedulers, Context switch. 3.3 Inter-process communication- Introduction, shared memory system & message passing system, critical section problem, semaphores. 3.4 Threads - Benefits, users and kernel threads, Multithreading Models - Many to One, One to One, Many to Many. 	10	22
04	Scheduling: Objectives: Describe CPU scheduling. Describe various CPU-scheduling algorithms. Solve problems based on them. Describe deadlock and its algorithm. 4.1 Scheduling & its types - Objectives, concept, CPU and I/O burst cycles, Pre-emptive, Non- Pre-emptive Scheduling, Scheduling criteria. 4.2 Types of Scheduling algorithms - First come first served (FCFS), Shortest Job First (SJF), Shortest Remaining Time(SRTN), Round Robin (RR) Priority scheduling, multilevel queue scheduling	10	20

17512 CW5

	4.3 Deadlock - System Models, Necessary Conditions leading to		
	Deadlocks, Deadlock Handling - Preventions, avoidance,		
	Banker's algorithm		
	File System and Memory Management :		
	Objectives:		
	 Distinguish between memory allocation methods 		
	Distinguish between various file access methods.		
	Describe files, file attributes and file structure.		
	5.1 Basic Memory Management - Partitioning, Fixed and Variable,		
0.5	Free Space management Techniques - Bitmap, Linked List.		20
05	5.2 Virtual Memory – Concept, Segmentation, Paging, Page table,	10	20
	Page fault.		
	5.3 File – Concepts, Attributes Operations, Types, and File System Structure.		
	5.4 Access Methods – Sequential, Direct, Swapping, File Allocation	i	
	Methods- Contiguous, Linked, Indexed.		
	5.5 Directory Structure – Single level, Two levels.		
	UNIX : A Case Study		·
	Objectives:		
06	Draw system structure and file system structure of UNIX	06	08
00	Distinguish between UNIX and LINUX system	UU	UO
	Introduction, Overview of UNIX, Structure of UNIX OS, Booting,		
	File System Of UNIX, UNIX and LINUX Comparison.		
	Total	48	100

List of Practical:

Sr. No.	Title of Experiment	No. of Hours
1	Differentiate between various Operating System	02
2	Use of file processing and Communication command – tr, wc, cut, paste, sort	02
3	Use of file processing and Communication command- who, who am I, mesg, talk, wall, write, news, mail.	02
4	Use of general purpose and process commands- date, time, cal, clear, banner	02
5	Use of general purpose and process commands-, tty, man, bc, ps, wait, sleep, exit, kill.	02
6	Work with file and directory commands viz, pwd, cat, ls, cd, mkdir, rmdir, rm, mv	02
7	Work with file and directory commands viz cp, join, split, head, tail, omm., pr, chmod, cmp.	02
8	Use of vi editor and editor commands	04
9	Write and execute menu driven shell scripts using case structures(any two)	02
10	Write and program to implement the Shortest Job First algorithm.	04
11	Write and program to implement the Priority scheduling algorithm.	04
12	Write and program to implement the Round-Robin algorithm.	04

**Students can perform any ten practical

Learning Recourses:

1. Books:

Sr. No	Book Title	Author	Publication
01	Operating System Concepts-VIII th Edition	Silberschatz Galvin	John Wiley and Sons
02	Operating System	Achyut S. Godbole	Tata McGraw Hill
03	Operating System	William Stallings	Pearson
04	Modern Operating systems	Andrew tanenbaum-3 rd edition	РНІ
05	Unix Concept and Programming	Sumitabha Das	Tata McGraw Hill
06	UNIX Programming	Kumar Saurabh	Wiley India

2. Websites:

- 1. cs.wisc.edu/~ bart/537 lecture notes-University of Wisconsin Madison.
- 2. www.cs.kent.edu/osf o3/notes/index.html- Vilinius Gediminas Technical University
- 3. http://www.howstuffworks.com/operating-system1.htm
- 4. www.computerhope.com/jargon/o/os.htm
- 5. en.wikipedia.org/wiki/Operating system

Demo lectures with power point presentations using LCD projector should be arranged to develop programming concepts of students.

Course Name : Computer Engineering Group

Course Code : CO/CD/CM/CW/IF

Semester : Fifth for CO/CM/CW/IF and Sixth for CD

Subject Title : Software Engineering

Subject Code : 17513

Teaching and Examination Scheme:

Tea	ching Sch	eme			Examinati	on Scheme		
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03			03	100			-	100

NOTE:

- > Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- > Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

Today, Computer Software is the most important technology on the world stage. Software Engineering is the basis for Software development. Software Engineering helps pave a path towards easier, faster, and less expensive methods to build and maintain high quality softwares.

Software Engineering is about imagination and creativity, the process of creating something apparently tangible from nothing. It presents a framework for the Software Engineers that provides a road-map for building high quality software products, within time and cost constraints.

This Subject helps the students to wonderfully blend the knowledge they have acquired from the First Semester to the Fifth Semester into a practically feasible creative concept. The students will then be able to convert this creative concept/idea into commercially viable product in the Sixth Semester under the head Industrial Project.

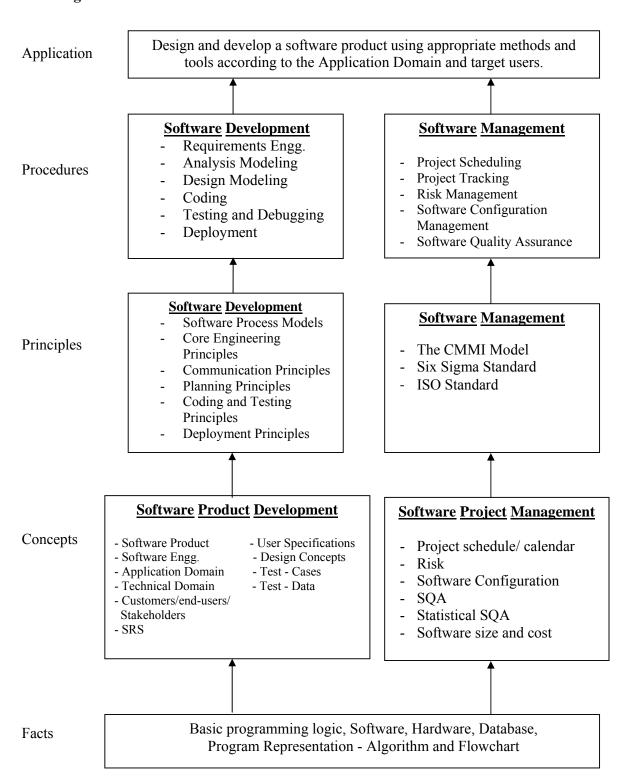

Objectives:

To develop following skills:

Intellectual Skills:

- 1. To develop awareness about the concepts of Software Development Life Cycle (SDLC).
- 2. To develop scientific and engineering approach towards software product development.
- 3. To develop both, the technical skills as well as managerial skills needed for software development.
- 4. Understand to conceive, plan, design, develop, and deploy software projects.
- 5. To be able to implement new ideas into real product.

Learning Structure:

Contents: Theory

Chapter	Name of the Topic	Hours	Marks
	Overview Of Software Engineering And The Software		
	Development Process		
	Objectives:-		
	➤ To understand meaning of Software and the types of		
	Software.		
	To understand the Software Engineering approach and its need		
	> To understand role of a software process and a process		
	model in a software project.		
	To understand various activities in the Software Process.		
	To know various models for the Software development process.		
	1.1 Definition of Software and Characterstics of Software1.2 Types / Categories of Software		
	1.3 Software Engineering – Definition, Need		
	1.4 Relationship between Systems Engineering and Software		
	Engineering Engineering		
	1.5 Software Engineering- A Layered Technology Approach		
	1.6 Software Development Generic Process Framework- Software		
01	Process, Software Product, Software Work-Product, Basic	08	20
01	Framework Activities, Umbrella Activities		20
	1.7 Personal and Team Process Models (PSP and TSP) –		
	Concept, Significance with respect to Ongoing Process		
	Improvement, Goals, List of framework activities included		
	1.8 Prescriptive Process Models-		
	The Waterfall Model (Nature, Situations in which applicable)		
	with example, Associated Problems)		
	The Incremental Model (Nature, Situations in which		
	applicable with example, General steps, Drawbacks)		
	RAD Model (Nature, Situations in which applicable with		
	example, General steps, Drawbacks)		
	Prototyping (Nature, Situations in which applicable with		
	example, General steps, Drawbacks)		
	Spiral Model (Nature, Situations in which applicable with		
	example, General steps, Advantages, Disadvantages)		
	1.9 Agile Software Development –		
	Difference between Prescriptive and Agile Process Model		
1	Features of the Agile Software Development Approach		
ı	 Concept of Extreme Programming. 		

	Software Engineering Practices And Software Requirements		
	Engineering		
	Objectives:-		
	To become familiar with the standard Software Engineering		
	Practices.		
	➤ To understand to carry out Requirements Engineering Tasks.		
	> To understand the importance of the SRS Document in the		
	software		
	Project.		
	2.1 Software Engineering Practices - Definition, Importance,		
	Essence		
	2.2 Core Principles of Software Engineering (Statements & Meaning		
	of each Principle)		
	2.3 Communication Practices		
	(Concept, Need of Communication, Statements and Meaning of		
	each principle)		
	2.4 Planning Practices		
	(Concept, Need of Planning, Basic Activities included,		
	Statements and Meaning of each principle)		
	2.5 Modelling Practices		
	 Concept of Software Modelling 		
	 Analysis Modelling 		
02	(Concept, Name of the analysis domains represented,	06	16
	Analysis		
	Modelling Principles - Statements & Meaning of each		
	principle		
	Design Modelling Consent Name of the three design agreets. Design		
	(Concept, Name of the three design aspects, Design		
	Modelling Principles - Statements & Meaning of each principle) 2.6 Construction Practices		
	Concept of Software Construction		
	Coding (Concept, Preparation Principles, Coding Principles,		
	Validation Principles)		
	Testing (Concept, Testing Principles)		
	2.7 Software Deployment		
	Concept of Delivery Cycle, Support Cycle & feedback Cycle		
	Deployment Principles- statements & meaning of each		
	principles		
	2.8 Requirements Engineering		
	Concept of Requirements Engineering		
	 Requirement Engineering Tasks (Concept and sub-tasks 		
	included)		
	2.9 SRS (Software Requirements Specifications)		
	• Concept of SRS		
	General Format of SRS		
	Need/Importance of SRS		
	Analysis And Design Modelling		
03	Objectives:-	12	18
	To understand to build Analysis Model for a Software.		
	> To understand to apply design concepts and to build design		

elements

- 3.1 Analysis Modelling
 - Concept and need of Analysis Modelling
 - Objectives of Analysis Modelling
- 3.2 Analysis Modelling approaches
 - Structured Analysis (Concept)
 - Object Oriented Analysis (Concept)
- 3.3 Domain Analysis
 - Concept of Technical Domain of the software (to be discussed with examples)
 - Concept of Application Domain of the Software (to be disscussed with the examples: Finance & Banking, Hospitability, Health care, Embeded Software, Inventory System, etc.)
 - Goals
 - Inputs and Output of Domain analysis
- 3.4 Building the Analysis Model
 - Data Modelling Concepts
 (Meaning of the Terms- Data Objects, Data Relationships, Data Attributes, Cardinality & Modality with Examples)
 - Flow- Oriented Modelling
 - DFD (Use, Standard Notations, Rules to be followed, DFD Construction – Using any case Study)
 - Data Dictionary (Concept, Use, contents to be incoporated, Advantages)
 - Creating a Control Flow Model (Nature of software applications where it is required and used, Guidelines used for creating the model)
 - Creating Control Specifications (CSPEC)
 - Creating Process Specifications (PSPEC)
 - Scenario- Based Modelling
 - Developing Use Cases
 - What is a Use Case?
 - Purpose of a Use Case
 - Use Case Diagram
 - Creating a behavioural model
 - Concept
 - General Steps involved

3.5 Design Modelling

- Design Process
 - Concept of Software Design
 - Design Quality Guidelines
- Design Concepts
 - Meaning and importance of the following eight concepts w.r.t. ease of design, development, testing and debugging- i) Abstration ii) Architecture iii) Patterns iv) Modularity v) Information Hiding vi) Functional Independence vii) Refinement viii)Refactoring

3.6 The Design model

- Data Design Elements
- Architectural- Design elements

	Interface Design Elements		
	Component-Level design elements		
	 Deployment-Level Design Elements 		
	Software Testing Strategies And Methods		
	Objectives:-		
	To become familiar with concepts and strategies of Testing		
	and Debugging.		
	4.1 Software Testing Fundamentals		
	Definition of Software Testing		
	 Concept of - Good Test, Successful Test, Testing strategies, 		
	Test Plan, Test Cases, Test Data.		
	4.2 Characterstics of Testing Strategies		
	4.3 Software Verification and Validation (V&V) - Concept and		
	difference between these two.		
	4.4 Testing Strategies		
	Unit Testing		
	Integration Testing		
04	- Top-Down Approach		16
04	- Bottom-up Approach		10
	- Regression Testing		
	- Smoke Testing		
	4.5 Alpha and Beta Testing (Concept and differences)		
	4.6 System Testing		
	 Concept of System Testing 		
	• Types (Recovery, Security, Stress, Performance Testing)		
	with examples		
	4.7 Concept of White-box and Black-Box Testing		
	4.8 Debugging		
	Concept and need of Debugging		
	• Characteristics of bugs		
	4.9 Debugging Strategies		
	Concept of Brute Force, Back Tracking, Induction,		
	Deduction		

	Software Project Management Objectives:-		
	To understand the importance of Project Scheduling.		
	To become familiar with Project Scheduling Techniques.		
	To understand the concept of software risks and Risk		
	Managemant.		
	➤ To understand the importance of Software Configuration		
	Management.		
	5.1 Introduction to Software Project Management and its need.		
	5.2 The Management Spectrum – 4 Ps and their Significance		
	5.3 Project Scheduling		
	Concept of Project Scheduling		
	Factors that delay Project Schedule		
	Principles of Project Scheduling		
	 Project Scheduling Techniques- Concept of Gantt Chart, 		
05	PERT, CPM		18
03	5.4 Concept of Task Network	08	18
	5.5 Ways of Project Tracking		
	5.6 Risk Management		
	• What is Software Risk?		
	 Concept of Proactive and Reactive risk strategies 		
	Types of Software Risks		
	5.7 Risk Assessment		
	Risk Identification		
	• Risk Analysis		
	Risk Prioritization		
	5.8 Risk control- Need, RMMM strategy		
	5.9 Software Configuration Management (SCM)		
	• Need of SCM		
	Benefits of SCM		
	• SCM Repository-Functions and Features supported		
	SCM Process- Change control and version Control		
	Software Quality Management		
	Objectives:-		
	To develop quality awareness for software products.		
	To become familiar with the available Quality Standards.		
	6.1 Basic Quality Concepts		
	6.2 Software Quality Assurance (SQA)		
	Definition of SQA		
06	SQA Activities	06	10
06	6.3 Concept of Statistical SQA	06	12
	6.4 Quality Evaluation Standards		
	 Six sigma for software - Concept of DMAIC and DMDAV 		
	Approach		
	 ISO 9000 for software - concept and major considerations 		
	6.5 CMMI- CMMI Levels, Process Areas considered.		
	6.6 CMMI Vs ISO.		
	6.7 McCall's Quality factors.		
	Total	48	100

Learning Resources:

1) Books:

Sr. No.	Title	Author	Publisher
1	Software Engineering- A Practitioner's Approach	Roger S. Pressman	TATA McGraw-Hill
2	Software Engineering-Principals and Practices	Rohit Khurana	Vikas Publishing House
3	Software Engineering	Pankaj Jalote	Wiley India
4	Software Engineering	S. A. Kelkar	PHI Learning

Course Code : CW Semester : Fifth

Subject Title : Data Warehousing and Data Mining

Subject Code : 17520

Teaching and Examination Scheme:

Teaching Scheme				Examinati	on Scheme			
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03		04	03	100			25@	125

NOTE:

- > Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- > Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

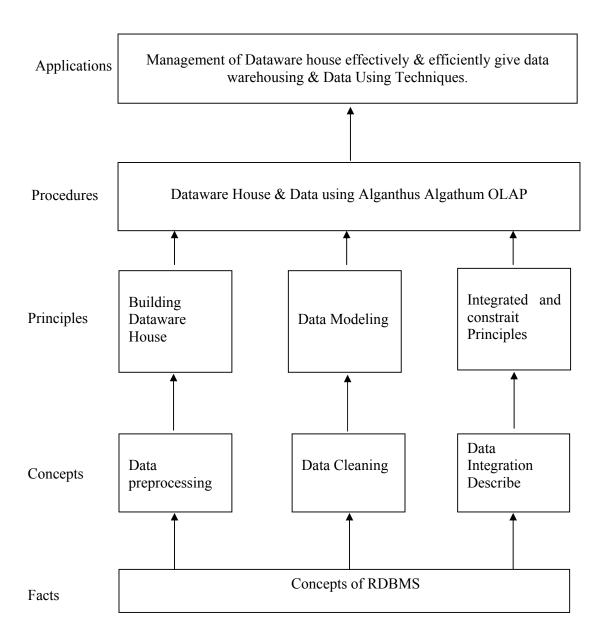

In the present era is essential to develop and manage Data Ware House in such away that is solve problem of data retrieval efficiently & effectively after student this subject student will be able to develop OLAP application.

Objectives:

Student will be able to:

- 1) To familiarize with the fundamental concepts of data warehousing and OLAP.
- 2) To develop concepts of Datamining methods in database management skills.
- 3) To be able to efficiently design and manage datastorages using data warehousing, OLPA and Datamining techniques.

Learning Structure:

Contents:- Theory

Chapter	Name of the Topic	Hours	Marks
01	Introduction to Data warehousing, Introduction to Decision support system, Definition of DSS, History of DSS, Ingrdients of DSS, Data and Model Management, DSS knowledgebase, User Interfaces, DSS users, Categories and classes of DSSs, Need for data warehousing, Operational and informational Data, Data warehouse definition and characteristics, Operational Data stores	08	16
02	Data Warehouse Components Architectural components, data preprocessing: Why preprocessing data? Data cleaning techniques, data integration and transformation, Data reduction techniques, discretization and concept hierarchy generation for numeric and categorical data, significant role of meta data, building a data warehouse, benefits of data warehousing	10	24
03	OLAP in Data warehouse A Multi diamentional datamodel, schemas for multi diamentional databases: stars, snowflakes, star join and fact constellations measures, concept hierarchies, OLAP operations in the multi diamentional data models, need for OLAP, OLAP tools, Mining text databases. Introduction to Mining World wide Web.	12	24
04	Data Mining Algorithms Concept description: What is concept description? Data generalization and summarization- based on characterization, Mining descriptive statistical measures in laege data bases, mining association rules: association rule mining, market, basket analysis, association rule classification, The Apriori algorithm, Constraint based association mining, sequential mining	12	28
05	Classification, Predication and knowledge discovery What is classification and Prediction? Data Classification Process, Issues regarding classification and predicaion, Classification by Decision tree induction, introduction to knowledge discovery, Innovative techniques for knowledge discovery, Applications of these techniques, in fraud detection, scientific data analysis and web mining.	06	08
	Total	48	100

Practical:

Skills to be developed:

Intellectual Skills:

- Understand OLAP concepts
- Understand Data warehousing and Data mining concepts

Motor Skills:

1. Use of appropriate data mining algorithms.

List of Practical: (Practicals shall be conducted using Oracle/DB2 Etc.)

- 1) Demonstration of Installation of Oracle database software or DB2 or suitable software tool.
- 2) Create a numerical and or text database.
- 3) Implementation of data cleaning techniques,
- 4) Study of Evolution of data management technologies, introduction to data warehousing concepts.
- 5) Builting a data warehouse for any small application like super market, student information system.
- 6) Design and development of application to implement defining subject areas, design of fact and diamentional tables, data marts.
- 7) Study of Design and development of application to implement OLAP and its operations like roll-up, drill down, slice and dice.
- 8) Mini project on basis of subject knowledge. (Maximum 4 students in a group and present seminar with report)

Learning Resources:

Books:

Sr. No.	Author	Title	Publication	
1	Paul Punnian	Data warehousing fundamentals	John Wiley	
2	Han, Kamber	Data mining concepts and techniques	Morgan Kaufmann	
3	Alex Berson	Data warehousing , data mining and OLAP	Tata McGraw Hill	
4	Ralph Kimball	The Data warehouse life cycle tool Kit	John Wiley	

Course Name: Computer Engineering Group

Course Code: CO/CM/IF/CW/CD

Semester : Fifth for CO/CM/IF/CW and Sixth for CD

Subject Title: Java Programming

Subject Code: 17515

Teaching and Examination Scheme:

Teaching Scheme				Examinati	on Scheme			
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
03		04	03	100	50#	1	25@	175

NOTE:

- > Two tests each of 25 marks to be conducted as per the schedule given by MSBTE.
- > Total of tests marks for all theory subjects are to be converted out of 50 and to be entered in mark sheet under the head Sessional Work (SW).

Rationale:

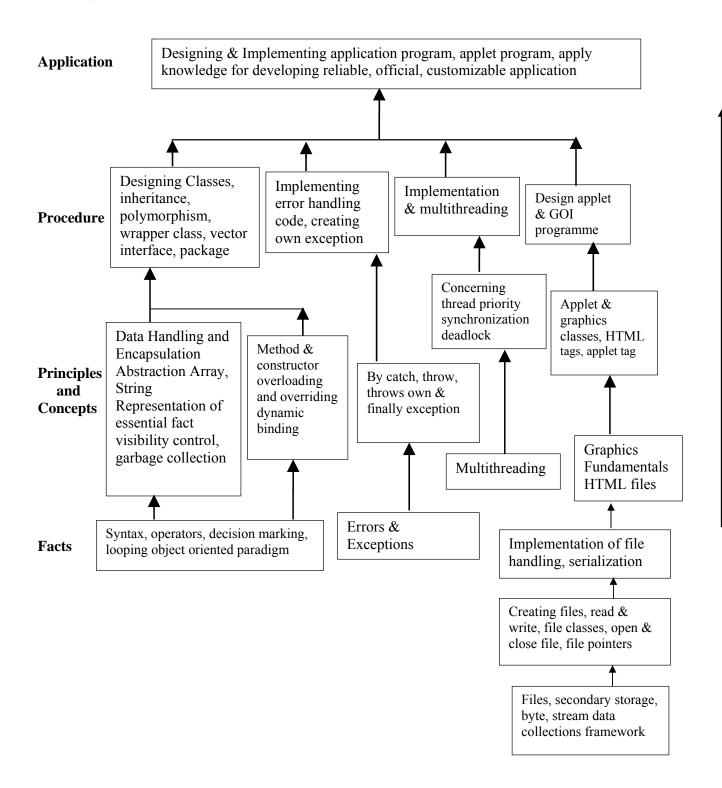

Nowadays, object oriented paradigm is of utmost importance for programming. Java language supports and is a very good means of understanding and implementing the OOP concepts. Java language enables the easy development of robust, secure, reusable and portable application. An application may be a standalone or it may be a web based. This subject provides an insight to understand and implement the OOP concepts, do the applet, graphics and multithreaded programming and Interact with the files. It also builds strong foundation for advanced java programming.

General Objectives:

Intellectual skills:

- ➤ Use of programming language constructs.
- > To know apply different logics to solve the given problem.
- To be able to write program using different implementations for the same problem.
- > Study different types of errors.
- > Debugging of programs.
- ➤ Understand different steps to develop program such as
 - a. Problem definition
 - b. Analysis
 - c. Design of logic
 - d. Coding
 - e. Testing
 - f. Maintenance

Learning Structure:

Contents:

Chapter	Content	Hours	Marks
01	 Introduction to Java Specific Objectives: ➤ To understand the features, Data types, Decision making and looping, constructs of java language. 1.1 Java Features and the Java Programming Environment. Object Oriented, Compiled, Interpreted, Platform independent, Portable, Robust and Secure, Dynamic. 1.2 Java Tokens & Data types Constants & Symbolic Constants, variables, dynamic initialization, data types, array & string, scope of variable, type casting, standard default values. 1.3 Operators & Expressions Arithmetic Operators, Relational Operators, Logical Operators, Increment & Decrement, Conditional Operators, Bit wise Operators, Instance of Operators, Dot Operators, Operator precedence & associativity, Evaluation of Expressions, Type conversions in expressions, Mathematical Functions - min(), max(), sqrt(), pow(), exp(), round(), abs(). 1.4 Decision making & looping If statement, if else statement, nested if else statement, if else if ladder, the switch statement, nested switch statement, The ?: operator, The while statement, the Do while statement, the 'for' statement, break, continue & return statement, nested loops, labeled loops, for-each version of the for loop. 	08	16
02	Classes, Objects & Methods Specific Objectives: ➤ To create classes, objects and make use of arrays and strings. ➤ They will also learn the concepts of inheritance and garbage collection. 2.1 Defining a class, creating object, accessing class members, Constructors & methods, types of constructors, nesting of methods, argument passing the 'this' keyword, command line arguments, varargs: variable-length arguments, garbage collection, finalize() method, the object class. 2.2 Visibility Control Public, Private, Protected, default, friendly private Protected access. 2.3 More on Arrays & Strings Types of arrays, creating an array, strings, string classes & string buffer, vectors, wrapper, classes, enumerated types. 2.4 Inheritance Types of Inheritance, single Inheritance, multilevel Inheritance, Hierarchical Inheritance, method & constructor Overloading & overriding, dynamic method dispatch, final variables, final methods, use of super, abstract methods & classes, static members.	12	24

	Interface and Package		
03	 Specific Objectives: To create and use interface and packages. They will also learn the package naming, conventions and about the static import. 3.1 Interface Define Interface, implementing interface, accessing interface, variables& methods, extending interfaces, interface references, nested interfaces 3.2 Package Define package, type of package naming & creating packages, accessing package, import statement, static import, adding class & interfaces to a package. 	06	12
04	Exception Handling & Multithreaded Programming Specific Objectives: ➤ To handle the exceptions in programs effectively. ➤ They will also learn 'how to make their programs multithreaded', set thread priorities, and the concept of deadlock. 4.1 Errors & Exception Types of errors, exceptions, try & catch statement, nested try statement, throws & Finally statement, build-in exceptions, chained exceptions, creating own exception, subclasses. 4.2 Multithreaded Programming Creating a Thread: By extending to thread class & by implementing runnable Interface. Life cycle of thread: Thread Methods: wait(), sleep(), notify(), resume(), suspend(), stop(). Thread exceptions, thread priority & methods, synchronization, inter-thread communication, deadlock.	08	16
05	Java Applets & Graphics Programming Specific Objectives: The students will be able to write interactive applets and make use of graphics in programming. They will also learn to change the background and the foreground color and to use the different fonts. Introduction to applets Applet, Applet life cycle (skeleton), Applet tag, Adding Applet To HTML file, passing parameter to applet, embedding <applet>tags in java code, adding controls to applets. Graphics Programming Graphics classes, lines, rectangles, ellipse, circle, arcs, polygons, color & fonts, setColor(), getColor(), setForeGround(), setBackGround(), font class, variable defined by font class: name, pointSize, size, style, font methods: getFamily(), getFont(), getFontname(), getSize(), getStyle(), getAllFonts() & getavailablefontfamilyname() of the graphics environment class.</applet>	10	20

06	File I/O & collection frame work Specific Objectives: ➤ The students will be able to work with File IO and collections frame work. ➤ They will also learn the concept of serialization. 6.1 File classes Stream classes, byte stream (FileInputStream&FileOutputStream), character stream (FileReader&FileWriter) serialization. 6.2 Introduction to collections frame work Array list, date class, set class, Iterator, map class.	04	12
	Total	48	100

List of Practical:

Sr. No.	Title of Experiment	No of Hours
1	Write a program to create and casting of different variables in JAVA	3
2	Write a program to print all prime numbers between a given range using while, for, do-while loop	3
3	Write a program to check the largest number from three number using nested if-Else with logical operator.	4
4	Write a program create a class "Student" having following attributes 1) studentName 2) rollno 3) branch 4) percentage. Create two methods, one method for I/P data using command line argument and one method for display data on screen.	4
5	Write a program for constructor overloading.	4
6	Write a program for multilevel Inheritance	4
7	Write a program for method overriding in Inheritance	4
8	Write a program for creating vectors to add ix objects and display the size and content of the vector.	4
9	Write a program to use wrapper class method for following conversion 1. Integer value to string 2. Double value to string 3. String value to integer value 4. Integer object to string 5. String to Long object	4
10	Write a program to accept ten numbers in an array and display the number in ascending order.	3
11	Write a program to create a user defined package named "College" which defines one class "student" with suitable data members and "display ()" method. Also declare an interface named "Branch" and abstract method "entry ()". Import the above package in a new class "XYZ".	4
12	Write a program based on user defined Package and interface.	4
13	Write a program to use user defined exception by accepting a number and throw an exception if the number is not a positive number.	4
14	Write a program to create two threads such that one thread print 1 to 10 numbers and another thread print 11 to 20 numbers.	3
15	Write a program that reads all the text from a file named "xyz.txt" and copies it into a new file named "abc.txt".	4

	Write a program to draw different shapes with different colors using applet	
	Srno. Shape Color	
16	1 Line black 2 Rectangle Red	4
	3 ellipse green	
	4 arcs yellow	
	5 triangle[polygon] blue	
	Write a program using applet to display "WELCOME TO JAVA" having	
	following parameters	
17	1 font name → "Times New Roman"	4
	2 size → 18	
	3 style → "BOLD"	
	Total	64

Subject Title: Behavioural Science

Subject Code: 17075

Teaching and Examination Scheme:

Teaching Scheme				Examinati	on Scheme			
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
01		02		-	-1	25 #	25 @	50

Rationale:

With increased globalization and rapid changing business expectations, employers are looking for wide cluster of skills to cater to the changing demand. Personality traits and soft skills are playing a key role in a student's career in this changing scenario. Corporate houses look for soft skills that supplement hard skills.

Addition of behavioural science in curriculum is intended to enhance the efficiency of a person so that he can contribute to overall growth of organisation. It aims at developing insight into leadership, team building, motivation, interpersonal relationship, problem solving, decision making and aspects of personality in a technician's profile. Addition of the topic of organizational culture will further mould him/ her in the organisational role.

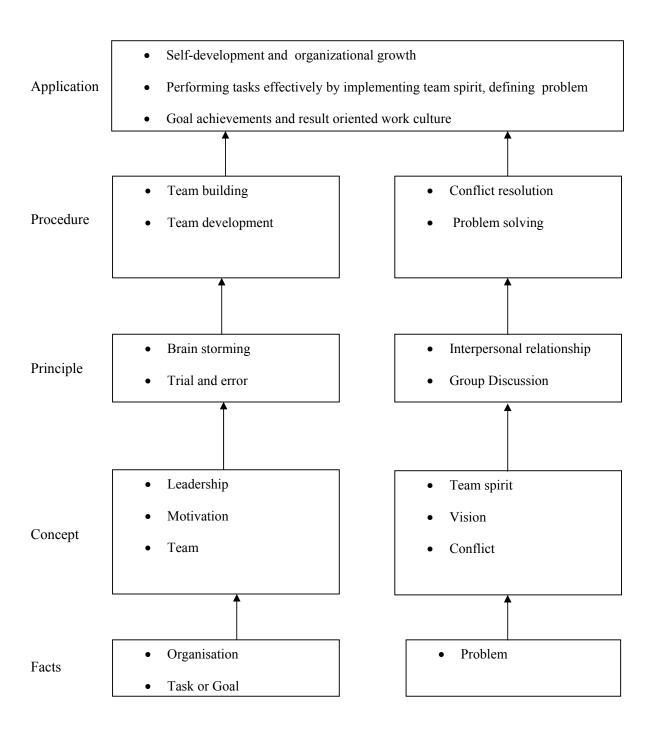

This subject of 'Behavioural Science' provides a broad base in which a technician can develop a successful career in the world of work.

General Objectives:

After studying this subject, the students will be able to:

- 1. Develop him/her as Team leader.
- 2. Use self-motivation and motivate others.
- 3. Build a team and develop team spirit among the team members.
- 4. Improve the interpersonal relationship skills.
- 5. Learn Problem solving and decision making skills.
- 6. Discuss a particular topic in a group and face the interview.

Learning Structure:

Theory:

Topic and Contents	Hours
Topic 1: LEADERSHIP	
Contents:	
1.1 Introduction – Importance, examples of different types of leaders.	
1.2 Meaning and Definition of Leadership.	0.2
1.3 Leadership qualities – Confidence, Vision, Communication Skills, influencing	02
people etc.	
1.4 Types of Leadership styles, their advantages and disadvantages – Autocratic,	
Democratic, Delegative, Bureaucratic and Laizze Fairie.	
Topic 2: MOTIVATION	
Contents:	
2.1 Meaning and Definition of motivation.	03
2.2 Types of motivation.	03
2.3 Maslow's Motivation theory.	
2.4 Job characteristic model to enhance motivation.	
Topic 3: TEAM BUILDING	
Contents:	
3.1 Definition of Team.	
3.2 Difference between Group and Team.	02
3.3 Need for formation of good team (vision, trust, cooperation, initiative, etc.)	
3.4 Approach to Team building (Personality based, activity based, skill based,	
problem solving based, etc.)	
Topic 4: CONFLICT RESOLUTION	
Contents:	
4.1 Definition of Conflict.	
4.2 Types of Conflict – Functional and Dysfunctional	04
4.3 Sources of Conflict – Ego, Authority, Frustration etc.	
4.4 Positive and Negative effects of conflicts.	
4.5 Methods of Conflict resolution – Compromising, withdrawal, forcing.	
Topic 5: PROBLEM SOLVING AND DECISION MAKING	
Contents:	
5.1 Steps in Problem Solving.	
5.2 Methods used for solving problems – trial and error method, brain storming,	03
lateral thinking method.	
5.3 Techniques used for Decision making- Decision tree, Decision Matrix, Mind	
Mapping etc.	
Topic 6: GROUP DISCUSSION AND INTERVIEW TECHNIQUES	
Contents:	
6.1 GROUP DISCUSSION	
 Objectives of Group Discussion (ability to work in team, speaking and 	02
listening skills, leadership, creativity)	
 Does and Don'ts of Group Discussion. 	
How to conclude Group Discussion.	

6.2 INTERVIEW TECHNIQUES		
 Types of Interviews. (patterned, stress, behavioural) 		
 Dress Code, Body Language and Communication Skill. 		
 Probable questions for Interview. 		
Telephonic or Video Interview.		
	Total	16

Practical:

Skills to be developed:

Intellectual Skills:

- Develop ability to find his strengths.
- Select proper source of information.
- Follow the technique of time and stress management.
- Set the goal.

Motor Skills:

- Follow the presentation of body language.
- Work on internet and search for information.
- Prepare slides / transparencies for presentation.

List of Practicals / activities:

- 1. Form a group of 4 or 5 students and discuss the topic 'Qualities of an effective leader'. Each group will prepare its list with justification to the entire class and write an assignment under the guidance of subject teacher.
- 2. Form a pair of student and each one from pair will ask each other questionnaire on motivation, self-motivation, experiences that motivated him or other which him for success in the past and write an assignment under the guidance of subject teacher based on discussion.
- 3. Form a group of 4 or 5 students and assign them a group activity such as 'making a shape from match stick (50 to 100 match sticks) without guidance and without group discussion.
- 4. The group as in activity 3 will now perform the same activity. After group discussion and under guidance of subject teacher, each student from a group will write an assignment for both the activities and write their inferences with reference to group discussion, team development, team building, etc.
- 5. Form a group of 8 to 10 student and arrange a group activity such as;
 - Industrial visit.
 - Visit to any historical place/fort/museum, etc
 - Housekeeping and cleaning of any laboratory/seminar hall for any function.

After the execution of activity student will write an assignment under guidance of teacher keeping in mind individual role, purpose of activity, inter dependency of work or task, coordination of person and task involved and final performance.

- 6. Write an assignment on interpersonal relationship and conflict management with student's personal experience of solving conflicts.
- 7. Form a group of 20 students and ask them to prepare a list of 8 to 10 problems affecting the institute. Subject teacher should analyze one such problem on black board using 'Fish bone technique' with the participation of students. Students will write an assignment consisting;
 - Apparent problem statement.
 - Analysis of the causes.

- Definition of real problem.
- 8. The subject teacher starts the session with 'Statement of the problem' written on the black board. After ensuring that all the participants are at the same level of understanding the statement of problem, he initiates NGT (Normal Group Technique) to arrive at maximum possible number of creative solutions.

Based on ranking matrix the group will arrive at feasible solutions and students will write an assignment consisting of;

- Problem Statement.
- Model of problem solving.
- List of creative solution suggested by participants.
- Write the most feasible solution based on given criteria.
- 9. Form a group of 4 to 5 students and give them a topic for GD for 10 to 15 minutes. Teacher should analyse GD on certain parameters and students will write an assignment on aspects of GD and prepare a format (suggested or designed by teacher) which gives details of GD carried out.
- 10. Arrange a guest lecture of H.R. Person from industry/expert in interview technique and conduct mock interview of each student. Student should write a report on this activity.
- 11. Arrange a visit to industry and gather information about organisation, product, turnover, work culture, vision/mission statement, quality policy, Corporate social responsibility etc. and write a report on it.

Note - Subject teacher shall guide the students in completing the assignments based on above practicals.

Learning Resources: Books:

Course Name: Computer Engineering Group

Course Code: CO/CD/CM/CW/IF

Semester : Fifth for CO/CM/CW/IF and Sixth for CD

Subject Title: Network Management and Administration

Subject Code: 17061

Teaching and Examination Scheme:

Teac	hing Scl	neme	Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
01		04			50#		25@	75

Rationale:

The world in the information era has become network centric. It provides comprehensive, self-contained tour of information which deals with data transmission and wiring, network technologies and internetworking protocols.

This subject provides the right balance between theoretical background and practical aspects of network. It is designed for the students to understand basics of computer network, but who want to begin an education about network management and administration.

Network manager is responsible for management of network system, applications in data and telecommunication services whereas network administrator is responsible for operations of key parts of the network.

The contents of the subject cover installation and configuration of network operating system and server which enables the students to manage and administer the network resources.

Objectives:

Intellectual Skills:

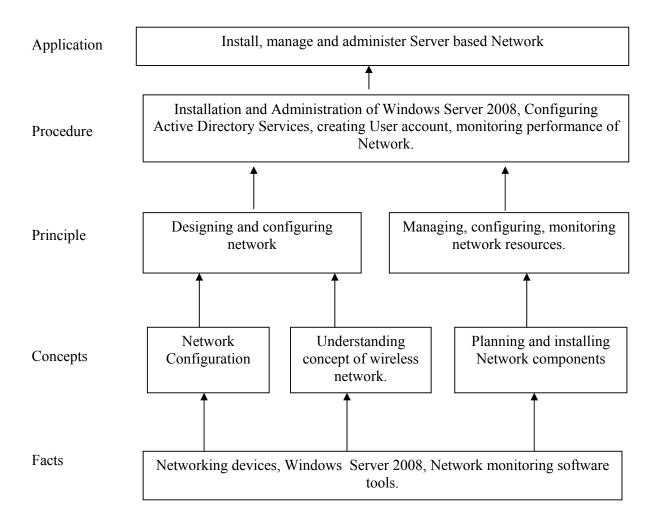

Students will be able to

- 1. Identify different network components.
- 2. Install, manage and administer the network.
- 3. Understand requirements of Windows Server 2008.
- 4. Use of resource sharing on network.
- 5. Manage different roles of Servers.

Motor Skills:

- 1. Handling of Computer systems.
- 2. Handling of different network devices.

Learning Structure:

Contents:

Chapter	Name of the Topic	Hours
	Concepts Of Networking	
	Objectives:-	
	➤ To understand basic hardware & software requirement for building a	
	network.	
0.1	1.1 Network configuration- Peer-to-Peer Network, Server based Network	02
01	- Network Topologies & Types.	02
	- Basic Network Media.	
	1.2 Planning & Installing Network Hardware	
	- Types of Server- File, Print, Mail, Web & Database Servers.	
	- Installing a NIC, Twisted Pair Cable, fiber optic Cable, Switches etc.	
	Windows Server 2008	
	Objectives:-	
	> To understand Network operating System & Concept of Active	
	Directory Services.	
	2.1 Installing & Configuring Windows Server	
	- Checking System Requirements.	
	- Choosing a File System.	
02	- Planning Partitions.	0.4
02	- Deciding TCP/IP Configuration.	04
	- Choosing Workgroups or domains.	
	2.2 Dealing with Directory Services	
	- Define directory services, (NDS), Windows NT Domains,	
	Microsoft Active Directory Service (ADS), X.500 Directory	
	Access Protocol (DAP), and LDAP.	
	- Understanding ADS Structure, Objects, Domains, Organizational	
	Units (OU), Trees, Forests.	
	Managing User Accounts & Resource Services	
	Objectives:-	
	Managing user accounts, shared folders and network printers.	
	3.1 Understanding user accounts	
	- Creating a new user.	
	- Setting user properties.	
	Deleting or disabling user accounts.Working with groups:- Group types, Group Scope, Creating a	
	Group & adding member to a Group.	
03	-Understanding Group Policies.	04
	3.2 Managing Resource Services	
	3.2.1 Managing File Server:	
	- Understanding permissions, sharing files & folders,	
	configuring File Server.	
	3.2.2 Managing Print server:	
	- Network Printing Process.	
	- Managing Shared Printer.	
	- Adjustment Print Server settings.	

	Configuring DHCP and DNS Objectives:-	
04	 To understand configuration of DHCP and DNS. 4.1 DHCP (Dynamic Host Configuration Protocol) Understanding DHCP- IP Address Assignment, DHCP Architecture. Working with DHCP Server – Installing, configuring and managing DHCP Server. 4.2 DNS (Domain Name System) – Understanding DNS Names- Domain, domain-naming, top level domains, sub-domains, Name Resolution. Managing DNS server and DNS Clients 	03
05	Network Administration And Security Objectives:- ➤ To understand network administration and maintaining security. 5.1 Role of Network Administrator. 5.2 Use of Software tools for monitoring & administration of Network. 5.3 Securing user accounts. 5.4 Securing the Network using Firewall, Disabling unnecessary Services. 5.5 Role of SNMP in Network Management. 5.6 Working with Windows-2008 backup software.	03
	Total	16

List of Practicals:

Sr. No.	Name of Practical	No. of Hours
	Study Network of your laboratory and list following terms-	
	1. Hardware components and their specification.	
1	2. Network configuration- Peer to peer, client-server network	04
	3. Software requirements	
	4. List network topology used in the laboratory	
	Design and install TCP/IP LAN in laboratory.	
2	1. Design Peer to Peer type of network.	04
	2. Select appropriate topology	04
	3. Install network hardware.	
	Install and configure Windows Server 2008	
	1. Check system requirement.	
3	2. Choose appropriate file system	06
	3. Plan for the partitions.	
	4. Set TCP/IP configuration.	
	5. Choose workgroup or domain.	
	Install Active Directory Service.	
4	1. Design ADS structure.	06
	2. Create a single domain forest	
	3. Create an organizational Unit.	
	Creating and managing User Accounts.	
	1. Create new user account.	
5	2. Set user account properties.	04
	3. Create a new Group.	
	4. Add new user to a group.	
	5. Delete existing user account.	

	Manage Shared Folders	
	1. Create shared folder	0.4
6	2. Set shared permissions.	04
	3. Use shared folder wizard to configure and manage file server.	
	Configure and manage Print Services	
	1. Print services such as print spooler, Print drivers.	
7	2. Use Print Management Console (PMC).	06
	3. Add printer using active directory search.	
	4. Adjust and manage print server and printer properties.	
	Set up DNS(Domain Name System) Server	
	1. Install DNS server on Windows Server 2008	
8	2. Use DNS management console to manage DNS server.	06
	3. Configure DNS client	
	4. Name resolution.	
	Install and configure DHCP Server.	
	1. Understanding DHCP	
9	2. Install and configure DHCP server	04
	3. Managing the DHCP server	
	4. Configure DHCP client	
	Tuning and monitoring network system	
10	1. Monitoring system with event viewer	06
10	2. Monitoring network performance using tools	
	3. Understanding and configuring Event log properties.	
	Working with Windows Server 2008 Back up utitilities and services	
11	 Understand backup software and types of backups 	06
11	2. Backing up and restoring server, files and folders	
	3. Creating and restoring Active directory backup.	
	Study of wireless network	
12	Study of Ad-hoc wireless network	04
12	2. Wireless network adapter and access points	
	3. Configuring wireless Access Points	
	Study of Cloud Computing as Network Infrastructure Component	
13	1. Study of Grid computing	04
13	2. cloud Structure	
	3. Essentials and benefits of cloud.

w.e.f Academic Year 2012-13 'G' Scheme

Course Name: Computer Engineering Group

Course Code: CO/CD/CM/CW/IF

Semester : Fifth for CO/CM/CW/IF and Sixth for CD

Subject Title: Professional Practices-III

Subject Code: 17062

Teaching and Examination Scheme:

Teac	ching Sch	neme	Examination Scheme					
TH	TU	PR	PAPER HRS	TH	PR	OR	TW	TOTAL
	1	03	1	1		1	50@	50

Rationale:

A recent global research report has indicated that the Indian IT industry and academic institute are expecting multifold growth in technical communication. An effective technical communication helps students to express their ideas either orally or in writing technical reports.

Man's main task in life is to give birth to himself to become what he potentially is. The most important product of his effort is his own personality. Professional Practices helps to develop student's personality to get acquainted with industrial environment. This content enhances the students for sharing knowledge technical competency, aiding education & information of career opportunity.

Bigness comes from doing many small things such as Industrial visits, Expert lectures, Seminars on technical topics, group discussions and by using techniques of information search which helps the students to bridge the gap between industry and institute environment.

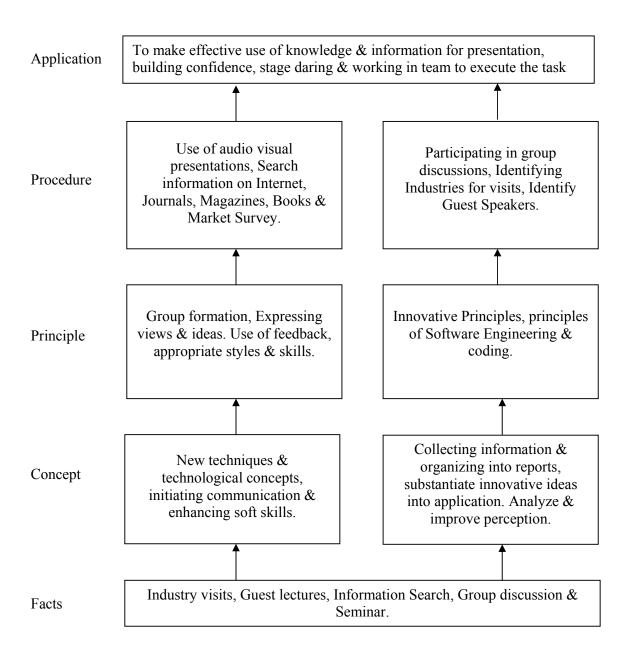

Objectives:

Intellectual Skills:

Students will be able to:

- 1. Acquire Information & Knowledge from different resources
- 2. Write the reports Industry Visits & Guest Lectures.
- 3. Deliver Seminars on a given topic which will help them to build self confidence & Knowledge.
- 4. Interact with each other through group discussion.
- 5. Present the feedback of various activities.

Learning Structure:

Contents:

Activity	Name of Activity
rictivity	Industry Visit: (At least One)
01	Industry visit: (At least one) Industry visit should be arranged and each student should submit the technical report individually as a part of term work. Visits can be arranged in any industry which focuses on computer automation, data processing, computer network and computer control machine.
02	Guest Lectures: (Any Two) Guest lectures by industry experts, other professional are to be arranged from the following topics or any other suitable technical area. The brief report is to be submitted by individual student as part of term work. a. 3 – D animation techniques. b. Stress management. c. IT Act 2008. d. Linux installation & administration. e. Resume writing & preparation of C.V. f. Introduction of "Python" programming language. g. Career opportunities in IT industry. h. Plastic Memory i. Psychological Personality Development. j. Managing emotional quotient k. Internet Marketing.
03	Information Search: (Any Two) Form a group of 2 students. Information should be collected from various resources like Internet, books, journals etc. on the following allocated topics or any other suitable topic suggested by teacher. Prepare Individual technical report on selected topics of 8-10 pages & deliver seminar on at least one topic. a. Android O.S. of mobile systems. b. Autonomic computing to manage complexity of network components. c. Cloud computing – application (any one). d. Biometrics – in secure E-transactions. e. Pervasive Computing f. E – MINE: A novel web mining approach g. 4 G wireless systems h. Jini – advanced set of network protocols i. Parasitic Computing j. E – wallet k. Nano – technology and applications l. DNA computing m. Artificial neural networks & their applications.
04	Group Discussion: (Any One) Form a group of 5 students and write a brief report on selected topic as a part of term work. Some of the suggested topics:- a. Role of UN in peace keeping b. Effect of cinema on youth c. Government contribution to IT d. Balance between professionalism & family e. Position of women India compare to other nations f. Present state of Indian Cricket Team

	g. Is globalization really necessary?
	h. Is India growing spiritually?
	i. Any other suitable topic.
	Prepare Yourself: (Any Two)
	Preparation towards Interview. Write a brief report on selected topic as a part of term
05	work.
03	a. Mock Interview
	b. Mock aptitude test & puzzle solving.(Attach answer paper)
	c. CV Preparation. (Attach CV).
	Seminar:
	Form a group of 4 students
06	Seminar should be on Final year Industrial Project synopsis & week wise plan for
	completion of project.
	Each student shall submit a report of at least 10 pages and deliver a seminar.

References:

- 1. Books on personality development & soft skills.
- 2. Engineering Subjects Reference books.
- 3. Journals & Magazines –IEEE journals, IT Technologies, PC Quest, Linux for You, CSI, Computer Today etc.
- 4. Local News Paper.
- 5. Books on General Knowledge, Aptitude Test, Puzzle Solving by R .S. Agarwal, Shakuntala Devi
- 6. Websites www.groupdiscussion.com
 - www. Seminarprojects.com

Industrial Training (Optional)

- Students who have completed industrial training in summer vacation after 4th Semester will be granted exemption for activities related to topic 1 to 4.
- These students shall submit report of Industrial training signed and certified by authorities from Industry. Student will give seminar on industry training attended by him.
- Evaluation will be done on seminar and report submitted by student.
