

neat diagram.

## 17327

## 15116

4 I	Hours / 100 Marks Seat No.	
	Instructions: (1) All questions are compulsory.	
	(2) Illustrate your answers with neat sketches wherever necessary	'-
	N	<b>Iarks</b>
1.	Attempt any ten:	(20)
	a) Enlist the different components of injection mould.	2
	b) Enlist the types of compression moulds.	2
	c) State the basic two differences between compression mould and injection mould.	2
	d) State the basic two differences between injection mould and blow mould.	2
	e) Define the term impression in injection mould.	2
	f) Enlist the various types of parting line.	2
	g) State the importance of register ring in injection mould.	2
	h) Define sprue and runner.	2
	i) Draw the runner layouts for 3 impression cavity and 4 impression cavity.	2
	j) State the factors to be consider for designing runner layout.	2
	k) State the necessity of ejection system in injection mould.	2
	l) State the function of sprue puller in injection mould.	2
	m) State the purpose of cooling in injection mould.	2
	n) State the necessity of venting in injection mould.	2
2.	Attempt any two:	(16)
	a) Enlist the types of Bolsters. Explain any three of them with neat diagram.	8
	b) Describe various runner cross section shapes with neat diagram.	8
	c) Describe pin ejection in detail with labelled diagram.	8
3.	Attempt any two:	(16)
	a) Enlist the different types of guide piller and guide bushes. Explain the construction features of any one of them with neat diagram.	f <b>8</b>
	b) Explain the constructional features of air ejection mechanism with neat diagram.	8
	c) Describe principle working and constructional features of cylindrical grinding machine with	

8

## Marks

<ul><li>a) Enlist the various types of gates. Explain any four types of gates with neat diagram.</li><li>b) Describe in detail the constructional features of cooling bolster with neat diagram.</li><li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li></ul>	4.	Attempt any two:	(16)
<ul> <li>c) Describe the constructional features of ejecton plate assembly with neat diagram.</li> <li>5. Attempt any two: <ul> <li>a) Enlist the various types of gates. Explain any four types of gates with neat diagram.</li> <li>b) Describe in detail the constructional features of cooling bolster with neat diagram.</li> <li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li> </ul> </li> <li>6. Attempt any two: <ul> <li>(1</li> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul> </li> </ul>		a) Explain the constructional features of any four types of register ring with neat diagram.	8
<ul> <li>5. Attempt any two: <ul> <li>a) Enlist the various types of gates. Explain any four types of gates with neat diagram.</li> <li>b) Describe in detail the constructional features of cooling bolster with neat diagram.</li> <li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li> </ul> </li> <li>6. Attempt any two: <ul> <li>(1</li> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul> </li> </ul>		b) Describe with detailed diagram about positioning of gate in injection mould.	8
<ul> <li>a) Enlist the various types of gates. Explain any four types of gates with neat diagram.</li> <li>b) Describe in detail the constructional features of cooling bolster with neat diagram.</li> <li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li> <li>6. Attempt any two: <ul> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul> </li> </ul>		c) Describe the constructional features of ejecton plate assembly with neat diagram.	8
<ul> <li>b) Describe in detail the constructional features of cooling bolster with neat diagram.</li> <li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li> <li>6. Attempt any two: <ul> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul> </li> </ul>	5.	Attempt any two:	(16)
<ul> <li>c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram.</li> <li>6. Attempt any two: <ul> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul> </li> </ul>		a) Enlist the various types of gates. Explain any four types of gates with neat diagram.	8
<ul> <li>6. Attempt any two:</li> <li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li> <li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li> </ul>		b) Describe in detail the constructional features of cooling bolster with neat diagram.	8
<ul><li>a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.</li><li>b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.</li></ul>		c) Describe step wise cold nobbing process for manufacturing of cavity inserts with neat diagram	n. <b>8</b>
b) Write in detail about "Battled hole" cooling system and "Spiral plug" cooling system with neat diagram.	6.	Attempt any two:	(16)
neat diagram.		a) Write in detail about indirect bolting method for attachment of mold to platen with neat diagram.	8
c) Describe the steps involved in bench fitting for proper allignment of mold.			8
		c) Describe the steps involved in bench fitting for proper allignment of mold.	8
